-I-FUNCTION: Glucagon plays a key role in glucose metabolism and homeostasis. Regulates blood glucose by increasing gluconeogenesis and decreasing glycolysis. A counterregulatory hormone of insulin, raises plasma glucose levels in response to insulin-induced hypoglycemia. Plays an important role in initiating and maintaining hyperglycemic conditions in diabetes.

-!-FUNCTION: GLP-1 is a potent stimulator of glucose-dependent insulin release. Play important roles on gastric motility and the suppression of plasma glucagon levels. May be involved in the suppression of satiety and stimulation of glucose disposal in peripheral tissues, independent of the actions of insulin. Have growth-promoting activities on intestinal epithelium. May also regulate the hypothalamic pituitary axis (HPA) via effects on LH, TSH, CRH, caytocin, and vasopressin secretion. Increases islet mass through stimulation of islet neogenesis and pancreatic beta cell proliferation. Inhibits beta cell apoptosis.

-!-FUNCTION: GLP-2 stimulates intestinal growth and up-regulates villus height in the small intestine, concomitant with increased crypt cell proliferation and decreased entercyte apoptosis. The gastrointestinal tract, from the stomach to the colon is the principal target for GLP-2 action. Plays a key role in nutrient homeostasis, enhancing nutrient assimilation through enhanced gastrointestinal function, as well as increasing nutrient disposal stimulates intestinal clucose transport and decreases
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              J. Biol. [8]

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Brubaker P.L.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               PubMed=10605628; DOI=10.1210/er.20.6.876;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            PubMed=14719035;
                                                                                                                                                                                                                                                                                              gastro-pyloro-duodenal activity.
SUBCELLULAR LOCATION: Secreted
TISSUE SPECIFICITY: Glucagon is secreted in the A cells of the
islets of Langerhans. GLP-1, GLP-2, oxyntomodulin and glicentia
are secreted from enteroendocrine cells throughout the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      mucosal permeability.
FUNCTION: Oxyntomodulin significantly reduces
FUNCTION: Glicentin may modulate gastric acid
specific manner in par
pancreatic A cells, the
cleaved by PCSK2/PC2.
                                                                                                                                                 gastrointestinal tract.
INDUCTION: Glucagon release is stimulated by hypoglycen inhibited by hypographycemia, insulin, and somatostatin.
GLP-2 are induced in response to nutrient ingestion.
                                   PTM: Proglucagon is posttranslationally processed in a tissue-specific manner in pancreatic A cells and intestinal L cells pancreatic A cells, the major bioactive hormone is glucagon
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           disposal. Stimulates intestinal glucose transport and decreases
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Physiol.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ö

APPLICANT: Whiff, Birgitte Schjellerup

APPLICANT: Wulff, Birgitte Schjellerup

APPLICANT: Edward, Martin

APPLICANT: Madsen, Ole Dragsbaek

APPLICANT: Madsen, Ole Dragsbaek

APPLICANT: Holst, Jens Juul

TITLE OF INVENTION: Use Of A Pharmaceutical Composition

TITLE OF INVENTION: Comprising An Appetite-Suppressing Peptide

NUMBER OF SEQUENCES:

ADDRESSES: No. 59122290 No. 5912229disk of No. 5912229th America,
                                                                                                                                                                                                       INFORMATION FOR SEQ ID NO:
SEQUENCE CHARACTERISTICS:
LENGTH: 15 amino acids
                                                                                                               TYPE: amino acid
STRANDENESS: single
TOPOLOGY: linear
MOLECULE TYPE: No. 5912229e
